Polish Your Skin to Perfection

with Cuccio Naturalé New Milk & Honey Skin Polisher

Valencia, CA – May 1, 2010

Cuccio Naturalé is unveiling a new product to the nail and skin care family, Milk & Honey Daily Skin Polisher. This complex formula is jammed packed with rich sugar cane extracts and soft jojoba micro beads (contains no plastics or pumice) to softly remove dead skin cells. This gentle exfoliant complex is safe to use on a daily basis to give skin a daily pick me up!

Cuccio Naturalé Milk & Honey skin polisher is an easy addition to your manicure and pedicure service to make for a true spa experience. After performing general nail preparation, gently apply about a quarter size amount onto your client's hands, massage in a circular motion to remove and lift off dry, dead skin cells. Use the polisher on the hands, forearm, elbows and knees to toes! After the exfoliation process is done, remove with a warm moist towel. Now that the skin pores are open it is prepared for a grape seed antioxidant oil treatment. Generously apply Cuccio's Grape Seed Hand Anti-oxidant oil to reduce the appearance of fine lines and wrinkles. Wrap hands and arms with a warm moist towel (let client relax for 5 minutes) then proceed with the next step of the manicure & pedicure service.

This ultra soft formula is great for delicate skin and daily use. Leave your client's skin feeling invigorated while releasing skins natural radiance in one simple add on service!

Product available: June 1st 2010

Item #3191

8oz. Salon: \$5.95
